

2022 marks the twenty-fifth anniversary of our organization, and while we celebrate the legacy, we are all set to embark on the next and new. With your tremendous support at every step of the way, we welcome the next chapter as Robert Bosch Engineering and Business Solutions (RBEI) changes its name to **Bosch Global Software Technologies (BGSW)**.

Take a sneak-peek into our journey so far by clicking on each year on the timeline.

1990 - 1998

## INCEPTION

**THE BEGINNING OF IT ALL, THE INITIATION.**

This was our start. Our first system, our first software development, our first office, and of course 1998 when we were recognized as a separate legal entity.

We put down our roots in India with the establishment of the first Software development for Diesel Systems.

1990

We took a step further with the first Software development for Gasoline Systems.

1992

Our first Software development for Car Multimedia was established.

1993

We opened up our very first office in Koramangala, Bengaluru.

1996

We started our first Software development for the Chassis Systems and became a separate legal entity - Robert Bosch India.

1998

1999 - 2004

## EXPANSION

**TO BE MORE THAN BEFORE**

At the dawn of the new century, we decided to explore and go beyond the boundaries of what we knew. We branched out into different areas and made our name known.

Our Mechanical Engineering support came to be.

2002

We launched our Hardware Engineering support.

2001

We developed the IRIS (The First Integrated Vehicle Simulator).

2004

We started the development of the Electronic Control Unit (ECU).

2003

2005 - 2008

## DIVERSIFICATION

**THE TIME OF CHANGE**

These years were extraordinarily eventful for us. From developing a complete car radio for the Indian market to establishing the first Electromagnetic Compatibility lab, we did it all. And we became **Robert Bosch Engineering and Business Solutions India**.

We released our first ECU-Prog and COM4.

2005

We inaugurated our Coimbatore office and developed a complete car radio for the Indian market. Not only that, but this was the year we also launched a semi-conductor design center.

2006

It was time for a change, and we became RBEI (Robert Bosch Engineering and Business Solutions).

2008

We took a step forward and developed our first Anti-lock Braking System (ABS) for India Original Equipment Manufacturer and established our first Electromagnetic Compatibility (EMC) lab.

2007

2009 - 2013

## GLOBALIZATION

**CROSSING THE BOUNDARIES**

It was time to go global. After establishing a stronghold in the Indian landscape, we felt that the world was calling us on a journey. We embarked on this expedition with the start of our international operations and expanded our roots to Mexico and Vietnam.

We kickstarted the nearshore development center in Ho Chi Minh City, Vietnam.

2010

We ventured into international waters with the start of a third-party business (Global) for IT.

2009

We spread our roots to Mexico with the establishment of the Mexico development center.

2013

2014 - 2019

## EXTENSION

**LEAVING AN IMPRINT ON THE GLOBE**

These were the years of unprecedented growth and development. We saw some moments and created solutions we are extremely proud of.

We inaugurated our Research & Technology Center and launched a high-tech camera for eye care.

2014

We set up our Hyderabad center along with an offshore center for Japanese hi-tech customers at Coimbatore. We had the pleasure of hosting the honorable Prime Minister of India Mr. Narendra Modi and German Chancellor Ms. Angela Merkel.

2015

We became a legally recognized entity in Japan.

2018

We launched an Intelligent transport management system (ITRMS) and IoT solution for smart living. We joined the Bosch Global AI center.

2016

We were recognized for our culture and received the Argya World Healthy Workplace Awards.

2019

2020 - Till Now

## INNOVATION

**CREATING THE WORLD OF TOMORROW, TODAY.**

2020, the year we can never forget. It's the year when the whole world came to a halt and had to think of newer ways to get things done. And we continued finding ways to make life better for the world, through technology and innovation!

We established the Software and Digital Solutions (SDS) to cater to our non-captive customers. This year saw a spurt in our innovation-focused initiatives with the launch of Hacker's Garage, a development center (Prime). We also set up a Paraplegia Rehab Center (Coimbatore) to take CSR to new heights. The NASSCOM Engineering and Innovation Award was another recognition for our software and engineering excellence.

2021

Thanks to our unique ability to offer end-to-end solutions and innovation we were the proud recipients of the #1 Design Award for Visascope. We launched our strategic transformation program #FitForFuture, which has now evolved with markers that define our vision of Fit2025.

2020

This is our story so far. And it's just the start. At Bosch Global Software Technologies, we are reimagining tomorrow. We are finding ways to make life better for humankind, with technology that touches lives. With technology that will help the world move forward. We are here to create the world of tomorrow, today
